

Good Pay. Good Career. Good Planet. Goodwill®

Are you looking for a good-paying, meaningful career with growth potential?

Come learn about our free 4-week paid training for jobs with average starting salaries of \$40k+ per year.

Get Paid to Train to Be an Electric Car Charging Station Tech

Goodwill® now offers hands-on training for electric vehicle supply equipment (EVSE) operations and maintenance (Electric Car Charging Stations.) The successful growth of electric vehicles will depend on reliable charging stations to power clean and green transportation. EVSE technicians are the backbone of charging infrastructure support and uptime.

If selected for this training course, you will participate in an intensive four-week program, which includes a commitment of 40 hours per week, paid earn-while-you-learn training for the clean energy industry. At the conclusion, you will earn industry-recognized certifications and receive job placement support.

You will also benefit from a host of wraparound support services to meet your unique needs. From access to transportation, tools, uniforms, mentoring and other services, we can connect you with what you need before, during and after your training.

With one month of paid, hands-on training you'll be ready to begin a career in renewable energy.

Here's what you'll learn:

- Electrical energy fundamentals
- Basics of electric vehicles and batteries
- EVSE charging standards
- EVSE electrical codes and safety standards
- Steps to commission an EV charging station
- Common EVSE maintenance tasks
- Customer service excellence

You'll graduate with industry certifications in:

- Workplace safety (OSHA-10, CPR/First Aid/AED)
- Construction basics
- NFPA 70e
- ChargerHelp!'s EVSE O&M certificate

You will also be prepared to sit for the SAE EVSE Field Technician Certification exam that will be released in 2024.
